ACCOMPLISHMENTS

- Honored with the Living Our Values Everyday (L.O.V.E.) Award at Intermountain Healthcare (2026)
- Awarded as Employee of the Month at ARUP Laboratories (2020)
- Awarded as Employee of the Month at the University of Utah Health Care Central Lab (2010)

SKILLS

- Laboratory Processes & Techniques: Hematology, Coagulation, Chemistry, Serology, Urinalysis, Microbiology, Blood Banking, and Phlebotomy
- Quality Management: Quality Control (QC), Proficiency Testing (PT), MPE Investigations
- Regulatory & Compliance: CAP, CLIA, Interface Validation, Policy/Procedure Development
- Operations & Instrumentation: Inventory Control, New Instrument Implementation, Workflow Standardization, Standard Operating Procedures
- System Standardization: Work Group Leadership, Cross-functional Communication, Process Improvement

Highly skilled and certified Medical Laboratory Scientist (MLS) with over 20 years of experience in clinical laboratory operations. Proven expertise in advanced instrument implementation, quality control (QC) management, and regulatory compliance. Adept at troubleshooting complex technical issues, validating new assays, and assisting supervisors with personnel training and workflow optimization. Passionate about driving laboratory standardization and preparing for supervisory advancement.

WORK HISTORY

November 2022 - Current

Medical Laboratory Scientist | Clinical Coach *Intermountain HealthCare*, Salt Lake City, UT

- Manage external proficiency survey processes to ensure 100% acceptable results over eight consecutive cycles through thorough analysis and prompt corrective measures
- Lead validation, and implementation of new laboratory analyzers, ensuring adherence to regulatory compliance standards
- Establish QC lot-to-lot transitions, conduct MPE (Maximum Permissible Error) investigations, and perform thorough lookbacks procedures to ensure diagnostic accuracy
- Resolve complex technical and operational issues, ensuring minimal turnaround time and uninterrupted workflow operations, decreasing analyzer downtime by 30% through troubleshooting correctly and preventive maintenance scheduling
- Draft, review, and refine 30+ laboratory policies and SOPs to align with current clinical standards and accreditation requirements
- Facilitate hands-on training, competency assessment, and clinical coaching for current and new laboratory personnel (approximate 3-5 scientists/ month)
- Perform phlebotomy, specimen processing, and comprehensive clinical laboratory tests (hematology, chemistry, urinalysis, coagulation, serology, microbiology, immunology, and blood banking) across a 510-bed hospital core laboratory with average daily workload of ~1100 tests/day.

November 2011 - November 2022

Lead Medical Laboratory Scientist *ARUP Laboratories*, South Jordan, UT

- Directed the daily workflow and operations of a specific technical work sections, ensuring efficient and timely testing
- Managed inventory control operations, minimizing reagent waste (saved approximately \$30,000 annually), and ensuring optimal stock levels for high-throughput laboratory testing
- Represented the hematology department in system-wide laboratory work groups, actively supporting standardization initiatives and best practices

- Analyzers: Roche COBAS 9000 series, Abbott Architect, Sysmex XN, Siemens Advia, Beckman Coulter DxU and Akray, Liason XL 3000, Phadia 100
- Laboratory Information Systems (LIS): Epic Beaker, Sunquest, Millennium, and Instrument Manager

CERTIFICATIONS

Medical Laboratory Scientist
American Society for Clinical Pathology (ASCP)
Issued Nov 2005

REFERENCES

Upon your request

- Assisted the supervisor with personnel duties, including event investigations, staff training, and annual competency assessments
- Collaborated with supervisors to identify staff performance issues, provided documentation, and assisted with corrective action and written counseling
- Executed advanced laboratory techniques and maintained strict analytical compliance with clinical laboratory operations protocols

May 2005 - November 2022

Senior Medical Laboratory Technologist *University of Utah Healthcare Central Laboratory*, West Valley, UT

- Performed high-complexity hematology, chemistry, serology, urinalysis, blood banking, microbiology testing, accurately assessing patient samples and operating complex laboratory analyzers.
- Interacted frequently with patient care providers, patients, and visitors, effectively communicating critical results and resolving inquiries
- Maintained over 20 detailed logs, closely inspected reagent labels, and operated monitoring systems per established protocols
- Resolved routine equipment malfunctions and escalated complex technical problems, maintaining strict adherence to laboratory safety and compliance guidelines

EDUCATION

June 2026

Master of Education Health And Wellness

American College of Education, Indianapolis, IN

May 2005

Bachelor of Science Medical Laboratory Science

University of Utah, Salt Lake, UT
